

**THE PARTNER FOR YOUR SUCCESS**

## Our Company Profile

RoserGroup is an Industrial corporation devoted to the Design, Development and manufacturing of Machinery and Equipment for the Food industry and specially for the **Meat sector**.

**Over 60 years** of tradition, combined with technical and technological expertise of our team, makes an excellent technology partner, reliable and professional.

## Our Company Profile

From 1992 we are present in the American market, through our branch in Mexico, **ROSER DE MEXICO, SA de CV**, was created initially as a commercial office and a distribution center. Following the strategic expansion of our Group, Since 2008 we built a new production unit in Toluca, to produce and distribute ROSER equipment.

With more than 50 employees among technicians, engineers and production staff and supplied with the most state-of-art equipment, the factory gives service to our customers in Central America and USA

## Our Company Profile

In 2012 we launched our Branch Office at MENA area ( Middle East and North Africa ) , based in Amman (Jordan) to be much more closer to our customers with the aim to promote our company and solutions for the food processing sector.

Roser Group MENA.

Design, supply and  
assembly of  
cutting lines for  
cattle and sheep.  
Industrial hygiene  
equipment  
Est. 1959

Machinery for  
sausage  
production  
Est. 1959

Machinery for  
Marinated,  
refrigerated and  
injected cooked  
meats  
Est. 1972

Process  
engineering and  
installations for  
the meat industry  
Est. 1997

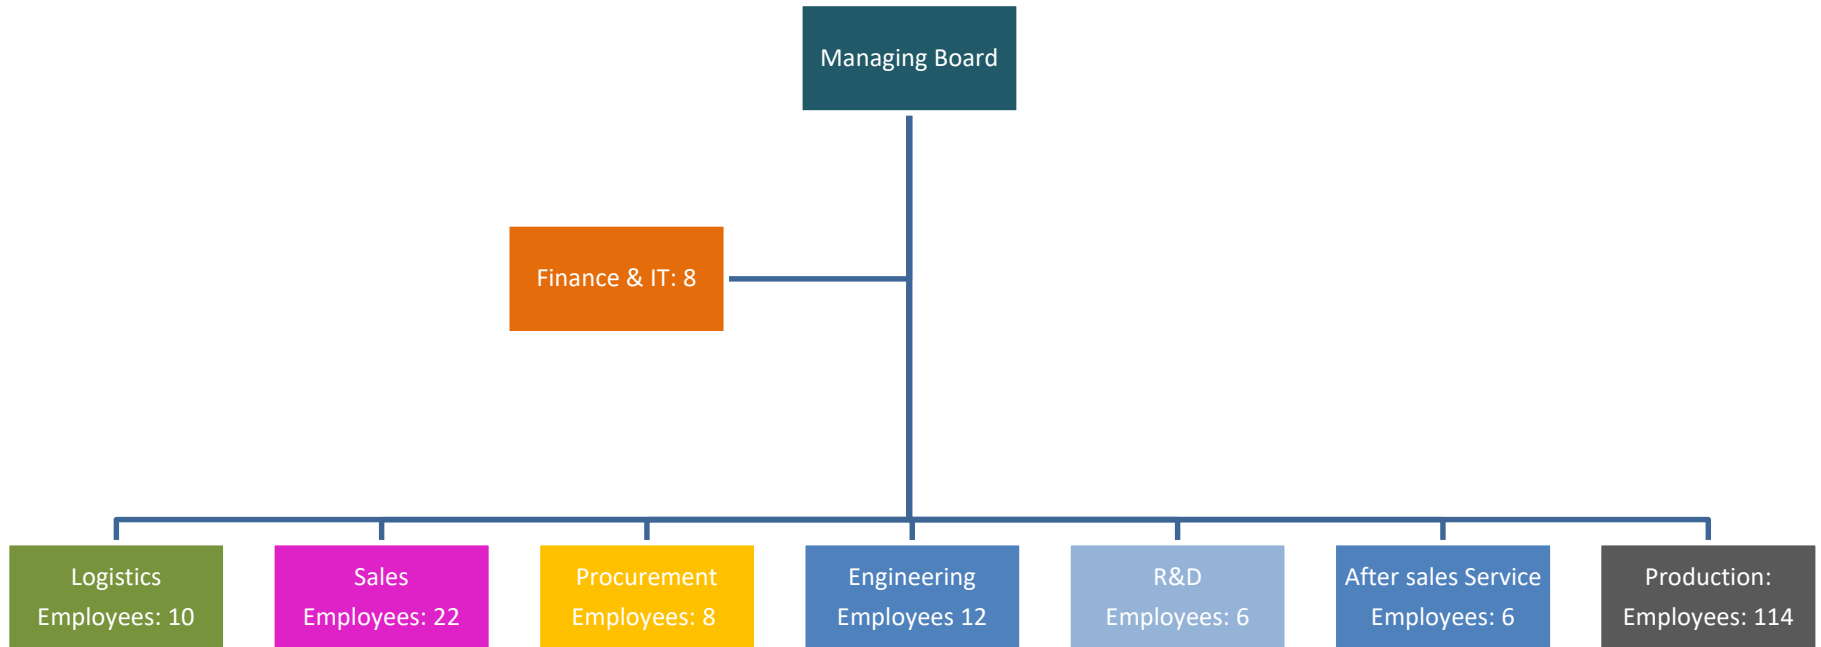

Rosergroup provides Global Solutions for Food and meat processes, complete Cutting and Deboning lines, Turn-key Plants , totally focused on our customer's satisfaction

- ✓ **Pre sales assessment** - We offer technical advice giving bespoke solutions according to client needs.
- ✓ **Research, development and innovation** – We work closely with each customer to find the most convenient solutions, we always benefit from customers suggestions to innovate and improve our equipment.
- ✓ **Quality control** – All manufactured equipment is strictly tested under production line.
- ✓ **After Sales Service** - Highly qualified staff working 7/24/365.

# Our Organization

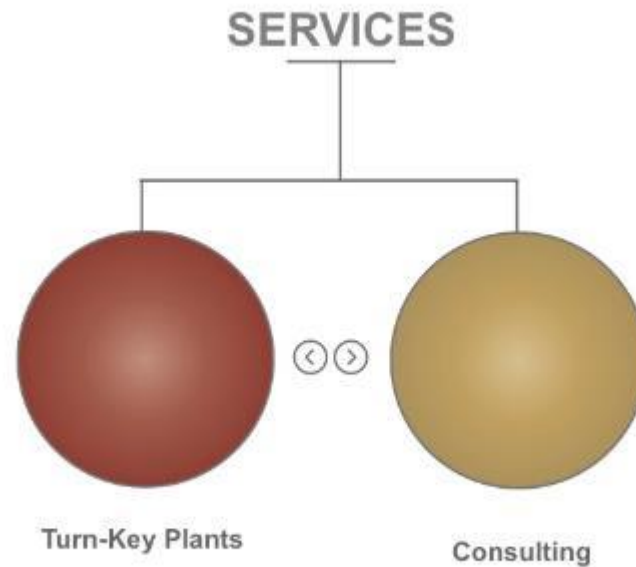

**OUR SERVICES**

RoserGroup chooses the best partners and Brands with high Prestige, liability and Experience.

We completed several projects worldwide in Countries such as Spain, Turkey, Venezuela, Mexico, Russia, and currently we are involved in projects in Nigeria, Sudan.

Hygienic technologies and equipment for the Food industry

Meat preparation lines

Hog Cattle and Lamb deboning lines

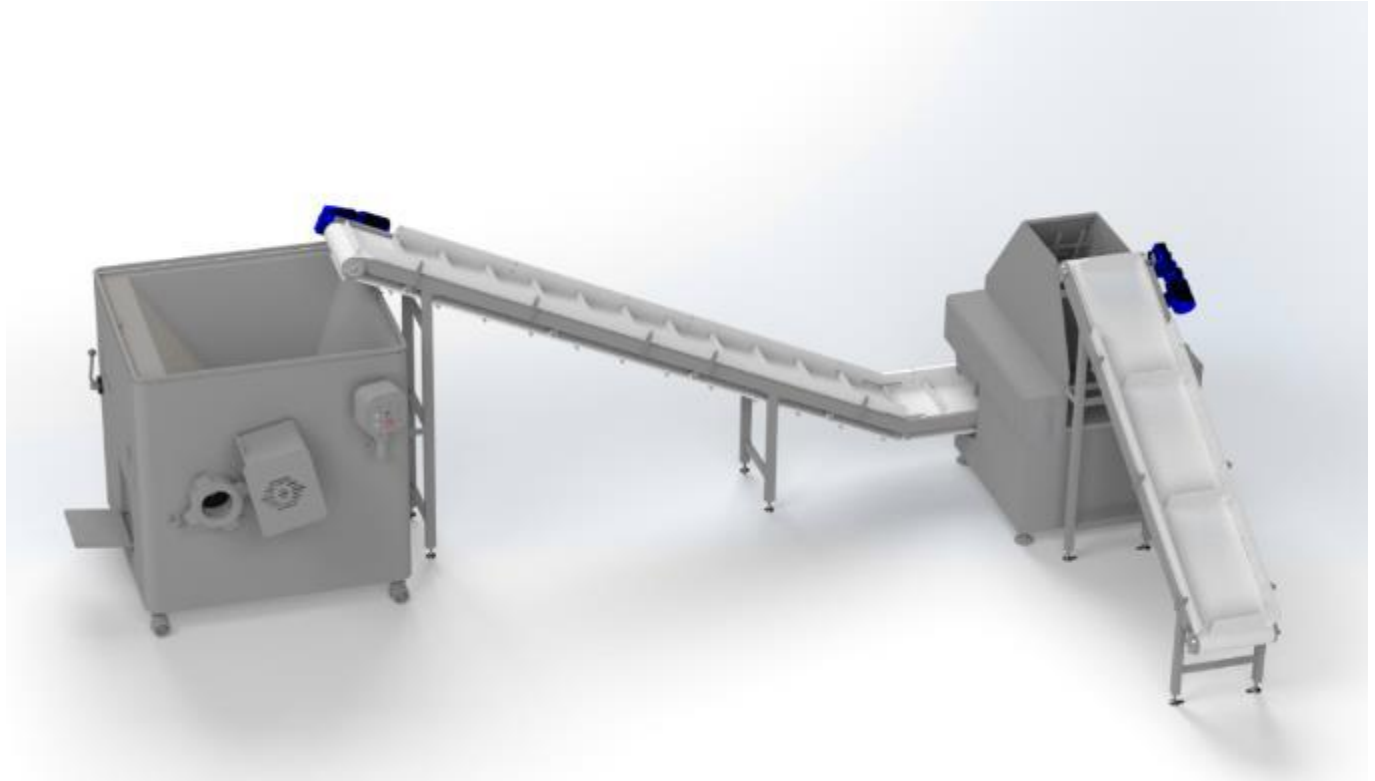

High technology systems to process marinated and cooked products

Consultancy & Engineering projects and installations for the meat industry

ROSER does research on meat production processes, provides technological advice for meat processing, and designs lines, plants and turn-key projects.

Meat preparation line »

CATO- develops and constructs a wide range of machinery for sausage production, with solid and robust designs which meet the particular needs of the different market segments.

« Grinders

« Fillers

« Mixers

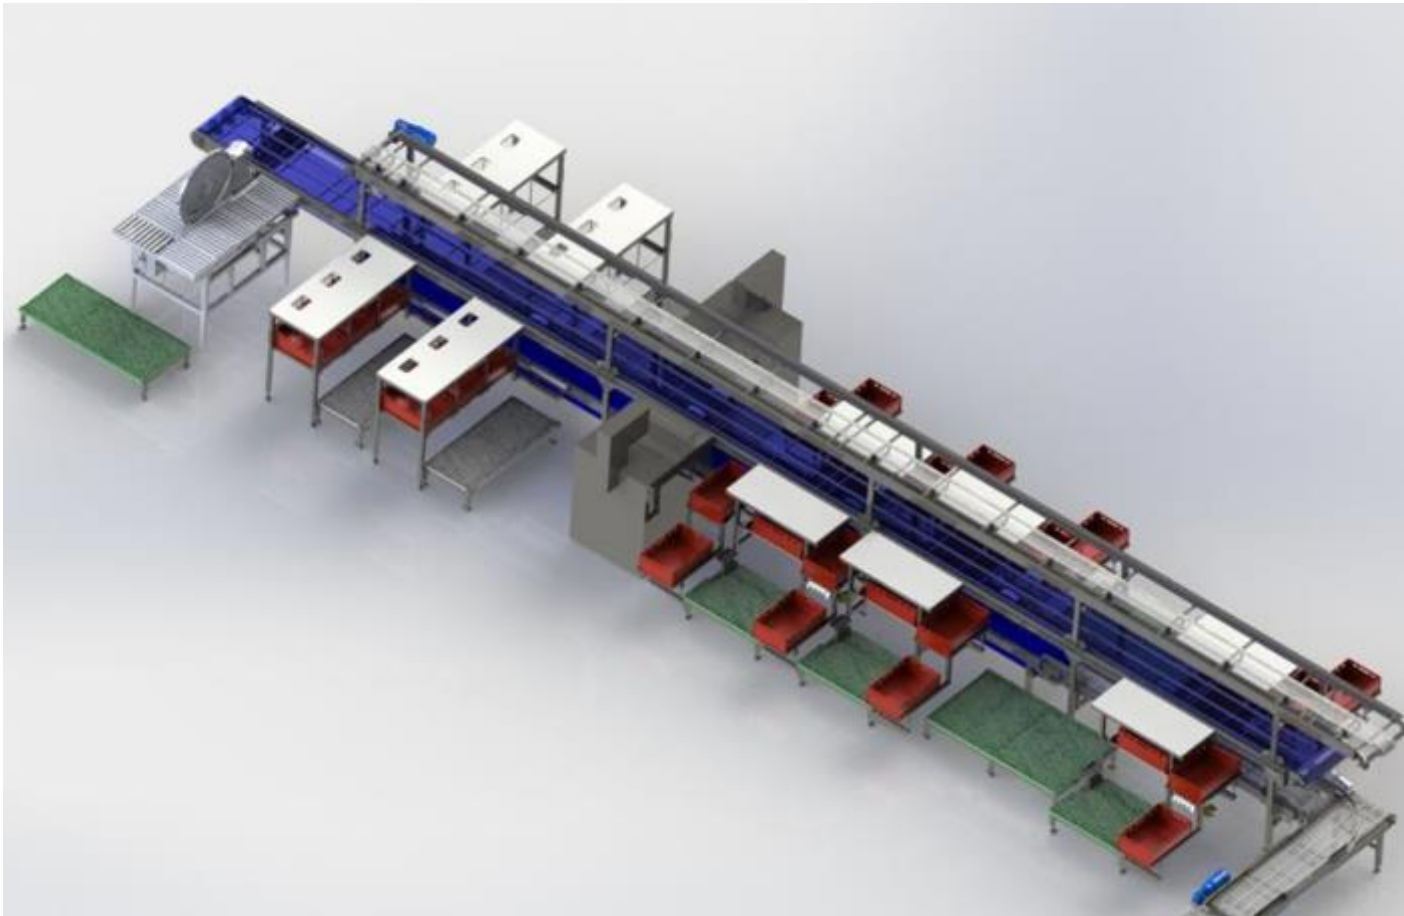

Bowl »  
Choppers

## Complete cut-up lines for lamb and cattle

## Complete cut-up lines for lamb and cattle

## Modular and Integrated Hygiene stations

Hygiene stations specially designed to ensure all sanitizing needs to access of production plants

## Washing Machines

« Washing machine for crates,  
up to 1200 crates/hour

OGALSA- Technology for the production of cooked food products and cold meats. Design and construction of complete lines: High Pressure injectors, brine preparation system, tenderizers, vacuum tumblers. Developing projects according to the specific needs of each Individually Company

**OGALSA**

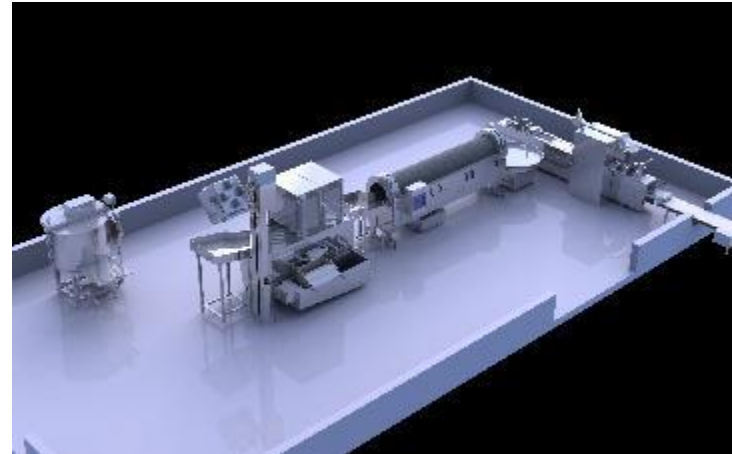

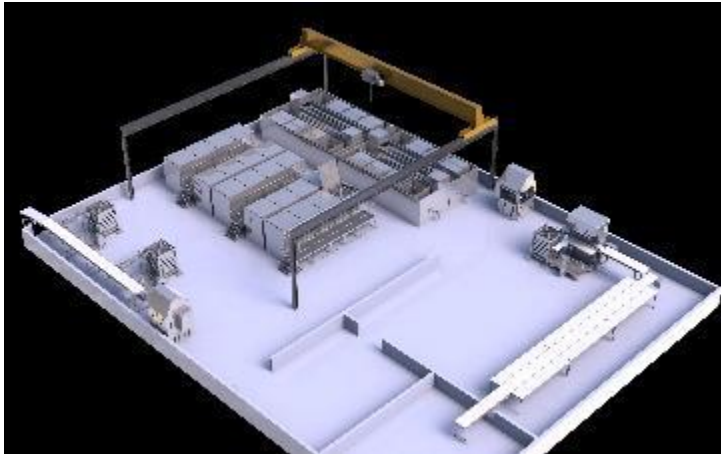

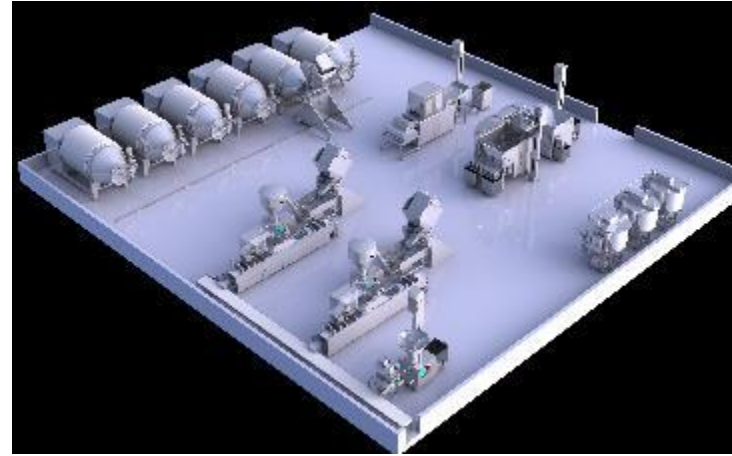

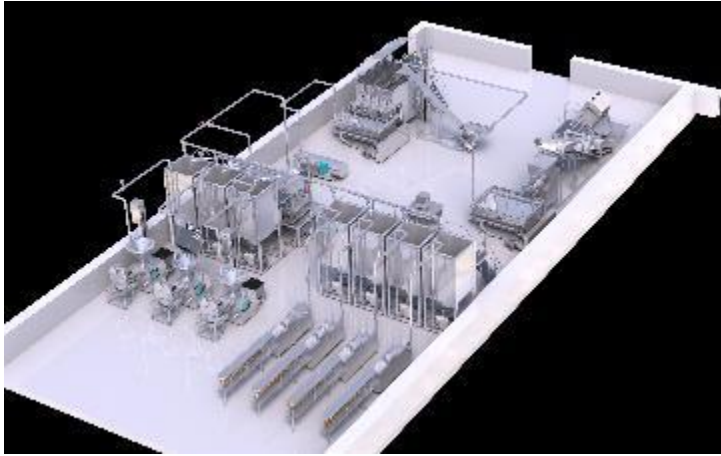

« Meat injector Production up to 4,7 Tn/hour.
